

Human Amelogenin, X-Linked (AMELX) ELISA Kit | AMELX elisa kit

Human Amelogenin, X-Linked (AMELX) ELISA Kit

CATALOG #
AAA140404

REACTIVITY
Human

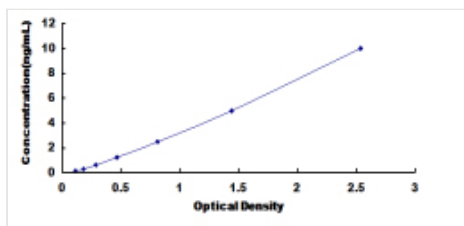

PRODUCT SYNONYMS

Amelogenin; X-Linked (AMELX); Human Amelogenin; X-Linked (AMELX) ELISA Kit; AMGX; AIH1; ALGN; AMG; AMGL; Amelogenesis Imperfecta 1; AMELX elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Amelogenin, X-Linked (AMELX). No significant cross-reactivity or interference between Amelogenin, X-Linked (AMELX) and analogues was observed.
Sequence Length	194
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.055ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Amelogenin, X-Linked (AMELX) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Amelogenin, X-Linked (AMELX) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for AMELX elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Amelogenin, X-Linked (AMELX). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Amelogenin, X-Linked (AMELX). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Amelogenin, X-Linked (AMELX), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Amelogenin, X-Linked (AMELX) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for AMELX elisa kit	Reproductive science

NCBI AND UNIPROT INFORMATION

NCBI GI #	528078428
NCBI GeneID	101836368
NCBI Accession #	NP_001268499.1
NCBI GenBank Nucleotide #	NM_001281570.1
NCBI Official Full Name	amelogenin, X isoform
NCBI Official Symbol	Amelx
NCBI Official Synonym Symbols	amelogenin
NCBI Protein Information	amelogenin, X isoform

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
