

Human Sphingosine Kinase 1 (SPHK1) ELISA Kit | SPHK1 elisa kit

Human Sphingosine Kinase 1 (SPHK1) ELISA Kit

CATALOG #
AAA140427

REACTIVITY
Human

PRODUCT SYNONYMS

Sphingosine Kinase 1 (SPHK1); Human Sphingosine Kinase 1 (SPHK1) ELISA Kit; SPHK1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of SPD. No significant cross-reactivity or interference between SPD and analogues was observed.
Sequence Length	320
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	0.117ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level SPD were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level SPD were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for SPHK1 elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of SPD in mouse serum, plasma, tissue homogenates, lung lavage fluid and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to SPD. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to SPD. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain SPD, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of SPD in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	334186773
NCBI GeneID	828239
NCBI Accession #	NP_193885.6
NCBI GenBank Nucleotide #	NM_118274.7
UniProt Accession #	Q8L7L1; O65419; F4JJK0
Molecular Weight	35,548 Da
NCBI Official Full Name	sphingosine kinase 1
NCBI Official Symbol	SPHK1
NCBI Official Synonym Symbols	F18E5.160; F18E5_160; sphingosine kinase 1; SPHK1
NCBI Protein Information	sphingosine kinase 1
UniProt Protein Name	Sphingosine kinase 1
UniProt Gene Name	SPHK1
UniProt Entry Name	SPHK1_ARATH

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
