

## Human Electron Transfer Flavoprotein Beta Polypeptide (ETFb) ELISA Kit | ETFb elisa kit

Human Electron Transfer Flavoprotein Beta Polypeptide (ETFb) ELISA Kit

CATALOG #  
**AAA140499**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Electron Transfer Flavoprotein Beta Polypeptide (ETFb); Human Electron Transfer Flavoprotein Beta Polypeptide (ETFb) ELISA Kit; ETF-B; MADD; FP585; ETFb elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for ETFb elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Electron Transfer Flavoprotein Beta Polypeptide (ETFb). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Electron Transfer Flavoprotein Beta Polypeptide (ETFb). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Electron Transfer Flavoprotein Beta Polypeptide (ETFb), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Electron Transfer Flavoprotein Beta Polypeptide (ETFb) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| Product Categories/Family for ETFb elisa kit   | Metabolic pathway; Nutrition metabolism                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
