

## Human Tryptophanyl tRNA Synthetase (WARS) ELISA Kit | WARS elisa kit

Human Tryptophanyl tRNA Synthetase (WARS) ELISA Kit

CATALOG #  
AAA140557

REACTIVITY  
Human

### PRODUCT SYNONYMS

Tryptophanyl tRNA Synthetase (WARS); Human Tryptophanyl tRNA Synthetase (WARS) ELISA Kit; GAMMA-2; IFI53; IFP53; WRS; TrpRS; hWRS; Tryptophan tRNA Ligase 1; Cytoplasmic; Interferon-induced protein 53; Tryptophanyl-tRNA synthetase; WARS elisa kit

| Reactivity                                        | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Tryptophanyl tRNA Synthetase (WARS). No significant cross-reactivity or interference between Tryptophanyl tRNA Synthetase (WARS) and analogues was observed.                                                                                                                                                                                                                                                    |
| Sequence Length                                   | 336                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for WARS elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Tryptophanyl tRNA Synthetase (WARS). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Tryptophanyl tRNA Synthetase (WARS). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Tryptophanyl tRNA Synthetase (WARS), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Tryptophanyl tRNA Synthetase (WARS) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| Product Categories/Family for WARS elisa kit   | Signal transduction; Enzyme & Kinase; Infection immunity                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
