

Rat Lactate Dehydrogenase C (LDHC) ELISA Kit | LDHC elisa kit

Rat Lactate Dehydrogenase C (LDHC) ELISA Kit

CATALOG #
AAA140714

REACTIVITY
Rat

PRODUCT SYNONYMS

Lactate Dehydrogenase C (LDHC); Rat Lactate Dehydrogenase C (LDHC) ELISA Kit; LDH-C; CT32; LDHX; LDH3; Cancer/Testis Antigen 32; LDH testis subunit; LDHC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Lactate Dehydrogenase C (LDHC). No significant cross-reactivity or interference between Lactate Dehydrogenase C (LDHC) and analogues was observed.
Sequence Length	332
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	3.12-200ng/mL
Sensitivity	1.26ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Lactate Dehydrogenase C (LDHC) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Lactate Dehydrogenase C (LDHC) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for LDHC elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Lactate Dehydrogenase C (LDHC). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Lactate Dehydrogenase C (LDHC). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Lactate Dehydrogenase C (LDHC), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Lactate Dehydrogenase C (LDHC) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for LDHC elisa kit	Enzyme & Kinase

NCBI AND UNIPROT INFORMATION

NCBI GI #	363981032
NCBI GeneID	3948
Molecular Weight	36,307 Da
NCBI Official Full Name	lactate dehydrogenase c
NCBI Official Synonym Full Names	lactate dehydrogenase C
NCBI Official Symbol	LDHC
NCBI Official Synonym Symbols	CT32; LDH3; LDHX
NCBI Protein Information	L-lactate dehydrogenase C chain
UniProt Protein Name	L-lactate dehydrogenase
UniProt Gene Name	LDHC
UniProt Entry Name	G9BCY7_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
