

Human Lipase Maturation Factor 2 (LMF2) ELISA Kit | LMF2 elisa kit

Human Lipase Maturation Factor 2 (LMF2) ELISA Kit

CATALOG #
AAA140738

REACTIVITY
Human

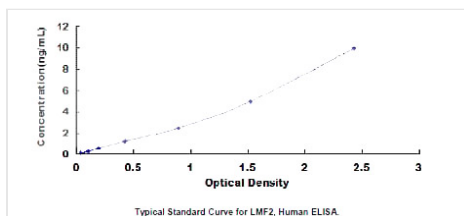

PRODUCT SYNONYMS

Lipase Maturation Factor 2 (LMF2); Human Lipase Maturation Factor 2 (LMF2) ELISA Kit; TMEM153; TMEM112B; Transmembrane Protein 153; LMF2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Lipase Maturation Factor 2 (LMF2). No significant cross-reactivity or interference between Lipase Maturation Factor 2 (LMF2) and analogues was observed.
Sequence Length	707
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.060ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Lipase Maturation Factor 2 (LMF2) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Lipase Maturation Factor 2 (LMF2) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for LMF2 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Lipase Maturation Factor 2 (LMF2). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Lipase Maturation Factor 2 (LMF2). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Lipase Maturation Factor 2 (LMF2), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Lipase Maturation Factor 2 (LMF2) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for LMF2 elisa kit	Metabolic pathway

NCBI AND UNIPROT INFORMATION

NCBI GI #	255918129
NCBI GeneID	91289
NCBI Accession #	NP_149977.2
NCBI GenBank Nucleotide #	NM_033200.2
Molecular Weight	67,156 Da
NCBI Official Full Name	lipase maturation factor 2
NCBI Official Synonym Full Names	lipase maturation factor 2
NCBI Official Symbol	LMF2
NCBI Official Synonym Symbols	TMEM153; TMEM112B
NCBI Protein Information	lipase maturation factor 2
UniProt Protein Name	Lipase maturation factor 2
UniProt Gene Name	LMF2
UniProt Synonym Gene Names	TMEM112B; TMEM153
UniProt Entry Name	LMF2_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
