

## Human Small Breast Epithelial Mucin (SBEM) ELISA Kit | SBEM elisa kit

Human Small Breast Epithelial Mucin (SBEM) ELISA Kit

CATALOG #  
AAA140852

REACTIVITY  
Human

### PRODUCT SYNONYMS

Small Breast Epithelial Mucin (SBEM); Human Small Breast Epithelial Mucin (SBEM) ELISA Kit; MUCL1; Mucin-Like Protein 1; Protein BS106; Mucin-like protein 1; SBEM elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity                                        | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Small Breast Epithelial Mucin (SBEM). No significant cross-reactivity or interference between Small Breast Epithelial Mucin (SBEM) and analogues was observed.                                                                                                                                                                                                                                                  |
| Sequence Length                                   | 90                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Assay Type                                        | Double-antibody Sandwich                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for SBEM elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Small Breast Epithelial Mucin (SBEM). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Small Breast Epithelial Mucin (SBEM). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Small Breast Epithelial Mucin (SBEM), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Small Breast Epithelial Mucin (SBEM) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| Product Categories/Family for SBEM elisa kit   | Tumor immunity; Infection immunity; Reproductive science                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
