

Human Apolipoprotein E (APOE) CLIA Kit | APOE clia kit

Human Apolipoprotein E (APOE) CLIA Kit

CATALOG #
AAA140999

REACTIVITY
Human

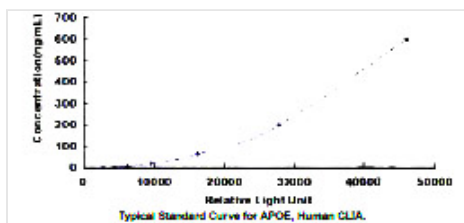

PRODUCT SYNONYMS

Apolipoprotein E (APOE); Human Apolipoprotein E (APOE) CLIA Kit; Apo-E; AD2; Apoprotein; Alzheimer Disease 2(E4-Associated; Late Onset; APOE clia kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Apolipoprotein E (APOE). No significant cross-reactivity or interference between Apolipoprotein E (APOE) and analogues was observed.
Sequence Length	317
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	0.82-600ng/mL
Sensitivity	0.37ng/mL
Application	Chemiluminescent immunoassay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Apolipoprotein E (APOE) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Apolipoprotein E (APOE) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for APOE clia kit	The microplate provided in this kit has been pre-coated with an antibody specific to Apolipoprotein E (APOE). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Apolipoprotein E (APOE). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Apolipoprotein E (APOE) level in the sample or standard.;
Product Categories/Family for APOE clia kit	Metabolic pathway ; Cardiovascular biology ; Hepatology

NCBI AND UNIPROT INFORMATION

NCBI GI #	705044152
NCBI GeneID	348
NCBI Accession #	NP_001289620.1
NCBI GenBank Nucleotide #	NM_001302691.1
Molecular Weight	36,154 Da
NCBI Official Full Name	apolipoprotein E isoform b
NCBI Official Synonym Full Names	apolipoprotein E
NCBI Official Symbol	APOE
NCBI Official Synonym Symbols	AD2; LPG; APO-E; LDLCQ5
NCBI Protein Information	apolipoprotein E
UniProt Protein Name	Apolipoprotein E
UniProt Gene Name	APOE
UniProt Synonym Gene Names	Apo-E
UniProt Entry Name	APOE_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
