

Human Fibrinogen (FG) CLIA Kit | FG clia kit

Human Fibrinogen (FG) CLIA Kit

CATALOG #
AAA141048

REACTIVITY
Human

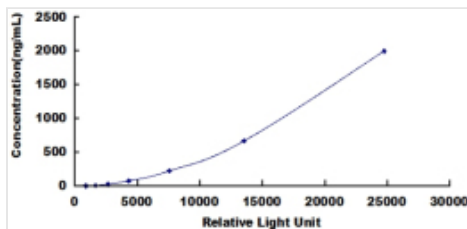

PRODUCT SYNONYMS

Fibrinogen (FG); Human Fibrinogen (FG) CLIA Kit; F1; FI; Fbg; Coagulation Factor I; FG clia kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Fibrinogen (FG). No significant cross-reactivity or interference between Fibrinogen (FG) and analogues was observed.
Sequence Length	444
Assay Type	Double-antibody Sandwich
Samples	Plasma
Detection Range	2.74-2,000ng/mL
Sensitivity	1.35ng/mL
Application	Chemiluminescent immunoassay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Fibrinogen (FG) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Fibrinogen (FG) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for FG clia kit	The microplate provided in this kit has been pre-coated with an antibody specific to Fibrinogen (FG). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Fibrinogen (FG). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Fibrinogen (FG) level in the sample or standard.;

NCBI AND UNIPROT INFORMATION

NCBI GI #	350
NCBI GeneID	280792
UniProt Accession #	P12799
Molecular Weight	50,244 Da
NCBI Official Full Name	fibrinogen
NCBI Official Symbol	FGG
NCBI Protein Information	fibrinogen gamma-B chain
UniProt Protein Name	Fibrinogen gamma-B chain
UniProt Gene Name	FGG
UniProt Synonym Gene Names	Gamma'
UniProt Entry Name	FIBG_BOVIN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
