

Human Retinol Binding Protein 1, Cellular (RBP1) CLIA Kit | RBP1 clia kit

Human Retinol Binding Protein 1, Cellular (RBP1) CLIA Kit

CATALOG #
AAA141069

REACTIVITY
Human

PRODUCT SYNONYMS

Retinol Binding Protein 1; Cellular (RBP1); Human Retinol Binding Protein 1; Cellular (RBP1) CLIA Kit; RBP-1; CRABP-I; CRBP; CRBP1; RBPC; Cellular retinol-binding protein I; RBP1 clia kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Retinol Binding Protein 1, Cellular (RBP1). No significant cross-reactivity or interference between Retinol Binding Protein 1, Cellular (RBP1) and analogues was observed.
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates and other biological fluids
Detection Range	0.27-200ng/mL
Sensitivity	0.12ng/mL
Application	Chemiluminescent immunoassay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Retinol Binding Protein 1, Cellular (RBP1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Retinol Binding Protein 1, Cellular (RBP1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for RBP1 clia kit	The microplate provided in this kit has been pre-coated with an antibody specific to Retinol Binding Protein 1, Cellular (RBP1). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Retinol Binding Protein 1, Cellular (RBP1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Retinol Binding Protein 1, Cellular (RBP1) level in the sample or standard.;
Product Categories/Family for RBP1 clia kit	Signal Transduction

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
