

Mouse Paxillin ELISA Kit | Pax elisa kit

Mouse Paxillin (Pax) ELISA Kit

CATALOG #
AAA144545

REACTIVITY
Mouse

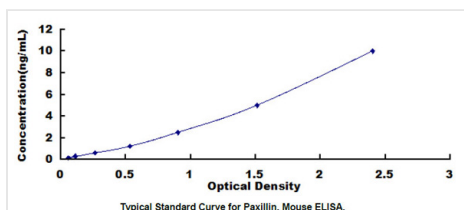

PRODUCT SYNONYMS

Paxillin; Mouse Paxillin (Pax) ELISA Kit; PXN; Pax elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Paxillin (Pax). No significant cross-reactivity or interference between Paxillin (Pax) and analogues was observed.
Sequence Length	586
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.059ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Paxillin (Pax) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Paxillin (Pax) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for Pax elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Paxillin (Pax). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Paxillin (Pax). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Paxillin (Pax), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Paxillin (Pax) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for Pax elisa kit	Signal transduction; Tumor immunity; Neuroscience

NCBI AND UNIPROT INFORMATION

NCBI GI #	58865866
NCBI GeneID	360820
NCBI Accession #	NP_001012147.1
NCBI GenBank Nucleotide #	NM_001012147.1
Molecular Weight	64,019 Da
NCBI Official Full Name	paxillin
NCBI Official Synonym Full Names	paxillin
NCBI Official Symbol	Pxn
NCBI Protein Information	paxillin
UniProt Protein Name	Paxillin
UniProt Gene Name	Pxn
UniProt Entry Name	PAXI_RAT

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
