

Mouse NANOG Homeobox Protein ELISA Kit | NANOG elisa kit

Mouse NANOG Homeobox Protein (NANOG) ELISA Kit

CATALOG # AAA144561	REACTIVITY Mouse
-------------------------------	----------------------------

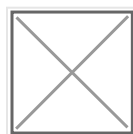

PRODUCT SYNONYMS

NANOG Homeobox Protein; Mouse NANOG Homeobox Protein (NANOG) ELISA Kit; Homeobox transcription factor Nanog; NANOG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of NANOG Homeobox Protein (NANOG). No significant cross-reactivity or interference between NANOG Homeobox Protein (NANOG) and analogues was observed.
Sequence Length	384
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.063ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level NANOG Homeobox Protein (NANOG) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level NANOG Homeobox Protein (NANOG) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for NANOG elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to NANOG Homeobox Protein (NANOG). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to NANOG Homeobox Protein (NANOG). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain NANOG Homeobox Protein (NANOG), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of NANOG Homeobox Protein (NANOG) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for NANOG elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	148357118
NCBI GeneID	792333
NCBI Accession #	NP_001091862.1
NCBI GenBank Nucleotide #	NM_001098392.1
NCBI Official Full Name	nanog homeobox
NCBI Official Synonym Full Names	nanog homeobox
NCBI Official Symbol	nanog
NCBI Official Synonym Symbols	hacp; wu:fd19e04; wu:fd20a07; zgc:193933
NCBI Protein Information	nanog homeobox

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
