

Human Triiodothyronine ELISA Kit | T3 elisa kit

Triiodothyronine (T3) ELISA Kit

CATALOG #
AAA14603

REACTIVITY
Human

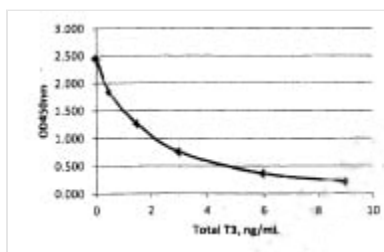

PRODUCT SYNONYMS

Triiodothyronine; Triiodothyronine (T3) ELISA Kit; Triiodothyronine (T3) ELISA; T3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum
Assay Type	Quantitative Competitive
Preparation and Storage	Product should be stored at 2-8 degree C. Product is stable for 24 months from the date of manufacturing.

ADDITIONAL INFORMATION

Related Product Information for T3 elisa kit

Intended Uses: The Triiodothyronine (T3) ELISA Kit is intended for the quantitative measurement of Triiodothyronine (T3) in human serum.

Principle of the Assay: The T3 is a solid phases competitive ELISA. The samples, assay buffer and T3 enzyme conjugate are added to the wells coated with anti-T3 monoclonal antibody. T3 in the patient's serum competes with a T3 enzyme conjugate for binding sites. Unbound T3 and T3 enzyme conjugate is washed off by washing buffer. Upon the addition of the substrate, the intensity of color IS inversely proportional to the concentration of T3 in the samples. A standard curve is prepared relating color intensity to the concentration of the T3.
