

HPV16 E6 envelope Recombinant Protein | HPV16 recombinant protein

HPV16 E6 envelope

CATALOG # AAA14636	APPLICATIONS IA (Immunoassay)
------------------------------	---

PRODUCT SYNONYMS

HPV16 E6 envelope; HPV16 recombinant protein

PRODUCT SPECIFICATIONS

Purity/Purification	The recombinant HPV16 E6 has 95% purity as determined by 10% PAGE (coomassie blue staining).
Form/Format	PBS with 25mM arginin with 4M urea
Concentration	1.7 mg/ml (varies by lot)
Applicable Applications for HPV16 recombinant protein	IA (Immunoassay)
Stability	1 year frozen. One month in solution at room temperature.
Important Note	Centrifue before opening to ensure complete recovery of vial contents.
Preparation and Storage	Upon arrival. Store at -20°C.

Application Data

ADDITIONAL INFORMATION

Related Product Information for HPV16 recombinant protein	More than 100 different human papillomaviruses cause proliferative diseases, many of which are malignant, such as cervical cancer. HPV-16 E6 is considered as the major viral oncoproteins involved in cervical cancer. The full length 159 amino acids of HPV16 E6 was expressed from E Coli, the expressed HPV E6 contains 6 x His tag at its C-terminal. The expressed protein HPV16 E6 with additional vector sequence migrated at 21kDa on 10% SDS-PAGE.
Product Categories/Family for HPV16 recombinant protein	Human Papillomaviruses

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
