ADDITIONAL INFORMATION

Related Product Information for Group 1 Norovirus recombinant protein	Norovirus can be classified as two groups, group 1 and group 2. Norovirus is a positive sense RNA virus with 7.5 kb nucleotides, encoding a major structural protein VP1 with 50-55kDa and a VP2 protein. The full length of VP1 capsid protein derived from the group 1 Norwalk virus was expressed and purified from E. coli with a 6 x his tag at its N-terminus, the recombinant protein can be used for vaccine study or immunoassay.
