

Epinephrine (EPI) ELISA Kit | EPI elisa kit

General Epinephrine (EPI) Mini Samples ELISA Kit

CATALOG #
AAA147368

REACTIVITY
Pan-species (General)

PRODUCT SYNONYMS

Epinephrine (EPI); General Epinephrine (EPI) Mini Samples ELISA Kit; Adrenaline; EPI elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Pan-species (General)
Specificity	This assay has high sensitivity and excellent specificity for detection of EPI. No significant cross-reactivity or interference between EPI and analogues was observed.
Samples	Serum, plasma cell lysates, cell culture supernates and other biological fluids
Assay Type	Quantitative Competitive
Detection Range	24.69-2,000pg/mL
Sensitivity	Typically less than 8.84pg/mL.
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level EPI were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level EPI were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%

ADDITIONAL INFORMATION

Related Product Information for EPI elisa kit	Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of EPI in serum, plasma cell lysates, cell culture supernates and other biological fluids. Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to EPI has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled EPI and unlabeled EPI (Standards or samples) with the pre-coated antibody specific to EPI. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of EPI in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of EPI in the sample.
Product Categories/Family for EPI elisa kit	Metabolic pathway; Infection immunity; Neuroscience; Hormone metabolism

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
