

Rat Butyrylcholinesterase (BCHE) ELISA Kit | BCHE elisa kit

Rat Butyrylcholinesterase (BCHE) ELISA Kit

CATALOG #
AAA147463

REACTIVITY
Rat

PRODUCT SYNONYMS

Butyrylcholinesterase (BCHE); Rat Butyrylcholinesterase (BCHE) ELISA Kit; BuChE; CHE1; E1; Pseudocholinesterase; Cholinesterase; Acylcholine acylhydrolase; Butyrylcholine esterase; Choline esterase II; BCHE elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of butyrylcholinesterase. No significant cross-reactivity or interference between butyrylcholinesterase and analogues was observed.
Sequence Length	597
Assay Type	Quantitative Sandwich
Samples	Rat serum, plasma, tissue homogenates and other biological fluids
Detection Range	1.56-100ng/mL
Sensitivity	< 0.58ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level butyrylcholinesterase were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level butyrylcholinesterase were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for BCHE elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to butyrylcholinesterase. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to butyrylcholinesterase. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain butyrylcholinesterase, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of butyrylcholinesterase in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of butyrylcholinesterase in rat serum, plasma, tissue homogenates and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	12621110
NCBI GeneID	65036
NCBI Accession #	NP_075231.1
NCBI GenBank Nucleotide #	NM_022942.1
UniProt Accession #	Q9JKC1; F1LQK0
Molecular Weight	67,777 Da
NCBI Official Full Name	cholinesterase
NCBI Official Synonym Full Names	butyrylcholinesterase
NCBI Official Symbol	Bche
NCBI Protein Information	cholinesterase
UniProt Protein Name	Carboxylic ester hydrolase
UniProt Gene Name	Bche

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
