

Mouse Complement Factor B (CFB) ELISA Kit | CFB elisa kit

Mouse Complement Factor B (CFB) Wide-range ELISA Kit

CATALOG #
AAA147544

REACTIVITY
Mouse

PRODUCT SYNONYMS

Complement Factor B (CFB); Mouse Complement Factor B (CFB) Wide-range ELISA Kit; CF-B; BF; BFD; CFAB; GBG; H2-Bf; PBF2; B-Factor; Properdin; Properdin factor B; C3/C5 convertase; Glycine-rich beta glycoprotein; CFB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Wide-range Complement Factor B (CFB). No significant cross-reactivity or interference between Wide-range Complement Factor B (CFB) and analogues was observed.
Sequence Length	761
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma and other biological fluids
Detection Range	0.78-50ng/mL
Sensitivity	0.35ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Wide-range Complement Factor B (CFB) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Wide-range Complement Factor B (CFB) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CFB elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Wide-range Complement Factor B (CFB). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Wide-range Complement Factor B (CFB). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Wide-range Complement Factor B (CFB), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Wide-range Complement Factor B (CFB) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for CFB elisa kit	Infection immunity; Immune molecule; Hematology; Autoimmunity

NCBI AND UNIPROT INFORMATION

NCBI GI #	116126
NCBI GeneID	14962
UniProt Accession #	P04186
Molecular Weight	85,004 Da
NCBI Official Full Name	Complement factor B
NCBI Official Synonym Full Names	complement factor B
NCBI Official Symbol	Cfb
NCBI Official Synonym Symbols	B; Bf; C2; Fb; H2-Bf; AI195813; AI255840
NCBI Protein Information	complement factor B
UniProt Protein Name	Complement factor B
UniProt Gene Name	Cfb
UniProt Synonym Gene Names	Bf; H2-Bf

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
