Rabbit anti-General Pyroglutamic Acid (PCA) Polyclonal Antibody | anti-PCA antibody

Polyclonal Antibody to Pyroglutamic Acid (PCA)

CATALOG #	HOST	REACTIVITY	APPLICATIONS
AAA147906	**Rabbit**	**General**	**Immunohistochemistry, Immunoprecipitation, Immunocytochemistry, ELISA**

PRODUCT SYNONYMS

Pyroglutamic Acid (PCA); Polyclonal Antibody; Polyclonal Antibody to Pyroglutamic Acid (PCA); 5-Oxoproline; Pidolic acid; Pyroglutamate; anti-PCA antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	General
Clonality	Polyclonal
Purity/Purification	Antigen-specific affinity chromatography followed by Protein A affinity chromatography
Form/Format	Liquid; Supplied as solution form in 0.01M PBS, pH7.4, containing 0.05% Proclin-300, 50% glycerol.
Concentration	0.5mg/mL (varies by lot)
Applicable Applications for anti-PCA antibody	IHC (Immunohistochemistry), IP (Immunoprecipitation), ICC (Immunocytochemistry), CLIA (Chemiluminescence Immunoassay), ELISA
Source	Polyclonal antibody preparation
Immunogen	Small Molecule, PCA conjugated to OVA
Preparation and Storage	**Storage:** Avoid repeated freeze/thaw cycles. Store at 4 degree C for frequent use. Aliquot and store at -20 degree C for 24 months. **Stability Test:** The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37 degree C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
