

Rat Visfatin (VF) ELISA Kit | VF elisa kit

Rat Visfatin (VF) ELISA Kit

CATALOG #
AAA148396

REACTIVITY
Rat

PRODUCT SYNONYMS

Visfatin (VF); Rat Visfatin (VF) ELISA Kit; Nampt; NAMPRTase; PBEF; PBEF1; Pre-B-Cell Colony Enhancing Factor; Nicotinamide Phosphoribosyltransferase; VF elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Visfatin (VF). No significant cross-reactivity or interference between Visfatin (VF) and analogues was observed.
Sequence Length	491
Assay Type	Competitive Inhibition
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	1.23-100ng/mL
Sensitivity	0.47ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Visfatin (VF) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Visfatin (VF) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for VF elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Visfatin (VF) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Visfatin (VF) and unlabeled Visfatin (VF) (Standards or samples) with the pre-coated antibody specific to Visfatin (VF). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Visfatin (VF) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Visfatin (VF) in the sample.
Product Categories/Family for VF elisa kit	Metabolic pathway; Cardiovascular biology; Hepatology

NCBI AND UNIPROT INFORMATION

NCBI GI #	29293813
NCBI GeneID	297508
NCBI Accession #	NP_808789.1
NCBI GenBank Nucleotide #	NM_177928.3
UniProt Accession #	Q80Z29; Q2VT47
Molecular Weight	55,438 Da
NCBI Official Full Name	nicotinamide phosphoribosyltransferase
NCBI Official Synonym Full Names	nicotinamide phosphoribosyltransferase
NCBI Official Symbol	Nampt
NCBI Official Synonym Symbols	Pbef; Pbef1
NCBI Protein Information	nicotinamide phosphoribosyltransferase
UniProt Protein Name	Nicotinamide phosphoribosyltransferase
UniProt Gene Name	Nampt
UniProt Synonym Gene Names	Pbef1; NAmPRTase; Nampt; PBEF

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
