

Mouse Neuropeptide Y (NPY) ELISA Kit | NPY elisa kit

High Sensitive Mouse Neuropeptide Y (NPY) ELISA Kit

CATALOG #
AAA148458

REACTIVITY
Mouse

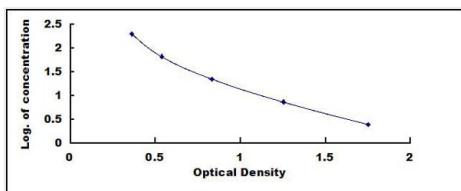

PRODUCT SYNONYMS

Neuropeptide Y (NPY); High Sensitive Mouse Neuropeptide Y (NPY) ELISA Kit; NP-Y; PYY4; CPON; Pro-neuropeptide Y; Neuropeptide tyrosine; C-flanking peptide of NPY; NPY elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of High Sensitive Neuropeptide Y (NPY). No significant cross-reactivity or interference between High Sensitive Neuropeptide Y (NPY) and analogues was observed.
Sequence Length	97
Assay Type	Competitive Inhibition
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	2.47-200pg/mL
Sensitivity	0.94pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level High Sensitive Neuropeptide Y (NPY) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level High Sensitive Neuropeptide Y (NPY) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for NPY elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to High Sensitive Neuropeptide Y (NPY) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled High Sensitive Neuropeptide Y (NPY) and unlabeled High Sensitive Neuropeptide Y (NPY) (Standards or samples) with the pre-coated antibody specific to High Sensitive Neuropeptide Y (NPY). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of High Sensitive Neuropeptide Y (NPY) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of High Sensitive Neuropeptide Y (NPY) in the sample.
Product Categories/Family for NPY elisa kit	Metabolic pathway; Endocrinology; Cardiovascular biology; Neuroscience; Hepatology

NCBI AND UNIPROT INFORMATION

NCBI GI #	189274
NCBI GeneID	4852
Molecular Weight	10,851 Da
NCBI Official Full Name	neuropeptide Y
NCBI Official Synonym Full Names	neuropeptide Y
NCBI Official Symbol	NPY
NCBI Official Synonym Symbols	PYY4
NCBI Protein Information	pro-neuropeptide Y
UniProt Protein Name	Pro-neuropeptide Y
UniProt Gene Name	NPY
UniProt Synonym Gene Names	NPY; CPON

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
