

Rat Synuclein Gamma (SNCg) ELISA Kit | SNCg elisa kit

Rat Synuclein Gamma (SNCg) ELISA Kit

CATALOG #
AAA148550

REACTIVITY
Rat

PRODUCT SYNONYMS

Synuclein Gamma (SNCg); Rat Synuclein Gamma (SNCg) ELISA Kit; SNC-G; gSYN; SR; BCSG1; PERSYN; PRSN; Breast Cancer Specific Protein 1; Persyn; Synoretin; SNCg elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Synuclein Gamma (SNCg). No significant cross-reactivity or interference between Synuclein Gamma (SNCg) and analogues was observed.
Sequence Length	123
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.060ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Synuclein Gamma (SNCg) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Synuclein Gamma (SNCg) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for SNCg elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Synuclein Gamma (SNCg). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Synuclein Gamma (SNCg). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Synuclein Gamma (SNCg), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Synuclein Gamma (SNCg) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for SNCg elisa kit	Tumor immunity; Neuroscience

NCBI AND UNIPROT INFORMATION

NCBI GI #	13928954
NCBI GeneID	64347
NCBI Accession #	NP_113876.1
NCBI GenBank Nucleotide #	NM_031688.1
UniProt Accession #	Q63544; Q6R2I0
Molecular Weight	12,976 Da
NCBI Official Full Name	gamma-synuclein
NCBI Official Synonym Full Names	synuclein, gamma
NCBI Official Symbol	Sncg
NCBI Protein Information	gamma-synuclein
UniProt Protein Name	Gamma-synuclein
UniProt Gene Name	Sncg

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
