

Chicken Trypsin (TRY) ELISA Kit | TRY elisa kit

Chicken Trypsin (TRY) ELISA Kit

CATALOG #
AAA149025

REACTIVITY
Chicken

PRODUCT SYNONYMS

Trypsin (TRY); Chicken Trypsin (TRY) ELISA Kit; TRY elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of TRPV3. No significant cross-reactivity or interference between TRPV3 and analogues was observed.
Sequence Length	1443
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	78-5,000pg/mL
Sensitivity	35pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level TRPV3 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level TRPV3 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for TRY elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of TRPV3 in human tissue homogenates, cell lysates and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to TRPV3. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to TRPV3. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain TRPV3, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of TRPV3 in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for TRY elisa kit	Human gene deletion

NCBI AND UNIPROT INFORMATION

NCBI GI #	1263133443
Molecular Weight	161,816 Da
NCBI Official Full Name	Trypsin
UniProt Protein Name	Trypsin
UniProt Gene Name	Trypsin

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
