

Human Anti-Deoxyribonuclease B Antibody (Anti-DNaseB) ELISA Kit | Anti-DNaseB elisa kit

Human Anti-Deoxyribonuclease B Antibody (Anti-DNaseB) ELISA Kit

CATALOG #
AAA149031

REACTIVITY
Human

PRODUCT SYNONYMS

Anti-Deoxyribonuclease B Antibody (Anti-DNaseB); Human Anti-Deoxyribonuclease B Antibody (Anti-DNaseB) ELISA Kit; Anti-DNase B; Antideoxyribonuclease B; Anti-DNaseB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of YWHAE. No significant cross-reactivity or interference between YWHAE and analogues was observed.
Assay Type	Competitive Inhibition
Samples	Serum, Plasma and other biological fluids
Detection Range	3.12-200ng/mL
Sensitivity	1.22ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level YWHAE were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level YWHAE were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for Anti-DNaseB elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for the in vitro quantitative measurement of YWHAЕ in human serum, plasma, tissue homogenates or other biological fluids. Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to YWHAЕ. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to YWHAЕ. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain YWHAЕ, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of YWHAЕ in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for Anti-DNaseB elisa kit	Infection Immunity; Rheumatology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
