

Chicken Alpha-1-Acid Glycoprotein (a1AGP) ELISA Kit | a1AGP elisa kit

Chicken Alpha-1-Acid Glycoprotein (a1AGP) ELISA Kit

CATALOG #
AAA149058

REACTIVITY
Chicken

PRODUCT SYNONYMS

Alpha-1-Acid Glycoprotein (a1AGP); Chicken Alpha-1-Acid Glycoprotein (a1AGP) ELISA Kit; AGP1; a1-AGP; ORM1; OMD 1; Orosomuroid 1; a1AGP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of a1AGP. No significant cross-reactivity or interference between a1AGP and analogues was observed.
Sequence Length	201
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma And Other Biological Fluids
Detection Range	1.56-100ng/mL
Sensitivity	0.71ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level a1AGP were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level a1AGP were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for a1AGP elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of a1AGP in bovine serum, plasma, urine and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to a1AGP. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to a1AGP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain a1AGP, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of a1AGP in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for a1AGP elisa kit	Infection immunity; Hepatology; Gastroenterology; Immunodeficiency

NCBI AND UNIPROT INFORMATION

NCBI GI #	178257
NCBI GeneID	5004
Molecular Weight	23,512 Da
NCBI Official Full Name	alpha-1 acid glycoprotein
NCBI Official Synonym Full Names	orosomucoid 1
NCBI Official Symbol	ORM1
NCBI Official Synonym Symbols	ORM; AGP1; AGP-A; HEL-S-153w
NCBI Protein Information	alpha-1-acid glycoprotein 1
UniProt Protein Name	Alpha-1-acid glycoprotein 1
UniProt Gene Name	ORM1
UniProt Synonym Gene Names	AGP1; AGP 1; OMD 1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
