

## Mouse Neuromedin U (NMU) ELISA Kit | NMU elisa kit

Mouse Neuromedin U (NMU) ELISA Kit

CATALOG #  
**AAA149072**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Neuromedin U (NMU); Mouse Neuromedin U (NMU) ELISA Kit; NM-U; NMU elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Reactivity              | Mouse                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of NMB. No significant cross-reactivity or interference between NMB and analogues was observed.                                                                                                                                                                                                                                                                                                                               |
| Sequence Length         | 174                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Assay Type              | Competitive Inhibition                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Samples                 | Serum, Plasma and other biological fluids                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Detection Range         | 123.5-10,000pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Sensitivity             | 46.7pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level NMB were tested 20 times on one plate, respectively. Intra-Assay: CV<10%                                                                                                                                                                                                                                                                                                                                 |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level NMB were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%                                                                                                                                                                                                                                                                                               |
| Preparation and Storage | <p>The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.</p> <p>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.</p> |

|-----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for NMU elisa kit | <p>Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of NMB in mouse serum, plasma and other biological fluids.</p> <p>Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. An antibody specific to NMB has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled NMB and unlabeled NMB (Standards or samples) with the pre-coated antibody specific to NMB. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of NMB in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of NMB in the sample.</p> |
