

Rat Protein Tyrosine Phosphatase Receptor Type C (CD45) ELISA Kit | CD45 elisa kit

Rat Protein Tyrosine Phosphatase Receptor Type C (CD45) ELISA Kit

CATALOG #
AAA149078

REACTIVITY
Rat

PRODUCT SYNONYMS

Protein Tyrosine Phosphatase Receptor Type C (CD45); Rat Protein Tyrosine Phosphatase Receptor Type C (CD45) ELISA Kit; GSTP1; GST-P1; DFN7; FAEES3; GST3; CD45 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of CD40L. No significant cross-reactivity or interference between CD40L and analogues was observed.
Sequence Length	65
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.058ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level CD40L were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level CD40L were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CD45 elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of CD40L in rabbit serum, plasma, tissue homogenates, cell lysates and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to CD40L. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to CD40L. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain CD40L, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of CD40L in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for CD45 elisa kit	Enzyme & Kinase; Metabolic pathway; Tumor immunity; Hepatology

NCBI AND UNIPROT INFORMATION

NCBI GI #	20149021
NCBI GeneID	5788
Molecular Weight	131,130 Da
NCBI Official Full Name	protein tyrosine phosphatase receptor type C, partial
NCBI Official Synonym Full Names	protein tyrosine phosphatase, receptor type C
NCBI Official Symbol	PTPRC
NCBI Official Synonym Symbols	LCA; LY5; B220; CD45; L-CA; T200; CD45R; GP180
NCBI Protein Information	receptor-type tyrosine-protein phosphatase C
UniProt Protein Name	Receptor-type tyrosine-protein phosphatase C
UniProt Gene Name	PTPRC
UniProt Synonym Gene Names	L-CA

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
