

Human Polyribonucleotide Nucleotidyltransferase 1 (PNPT1) ELISA Kit | PNPT1 elisa kit

Human Polyribonucleotide Nucleotidyltransferase 1 (PNPT1) ELISA Kit

CATALOG #
AAA149168

REACTIVITY
Human

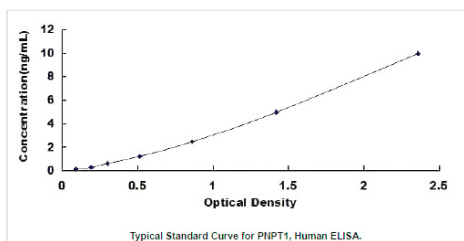

PRODUCT SYNONYMS

Polyribonucleotide Nucleotidyltransferase 1 (PNPT1); Human Polyribonucleotide Nucleotidyltransferase 1 (PNPT1) ELISA Kit; PNPase; OLD35; Polynucleotide Phosphorylase; 3'-5' RNA Exonuclease; 3'-5' RNA exonuclease OLD35; Polynucleotide phosphorylase-like protein; PNPT1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of PNPLA3. No significant cross-reactivity or interference between PNPLA3 and analogues was observed.
Sequence Length	783
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.054ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level PNPLA3 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level PNPLA3 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for PNPT1 elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of PNPLA3 in human tissue homogenates, cell lysates and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to PNPLA3. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to PNPLA3. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain PNPLA3, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of PNPLA3 in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for PNPT1 elisa kit	Enzyme & Kinase

NCBI AND UNIPROT INFORMATION

NCBI GI #	31657166
NCBI GeneID	87178
Molecular Weight	85,951 Da
NCBI Official Full Name	Polyribonucleotide nucleotidyltransferase 1
NCBI Official Synonym Full Names	polyribonucleotide nucleotidyltransferase 1
NCBI Official Symbol	PNPT1
NCBI Official Synonym Symbols	OLD35; DFNB70; PNPASE; old-35; COXPD13
NCBI Protein Information	polyribonucleotide nucleotidyltransferase 1, mitochondrial
UniProt Protein Name	Polyribonucleotide nucleotidyltransferase 1, mitochondrial
UniProt Gene Name	PNPT1
UniProt Synonym Gene Names	PNPASE; PNPase 1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
