| Clone Number                                   | C6                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Specificity                                    | The antibody is a mouse monoclonal antibody raised against MSLN. It has been selected for its ability to recognize MSLN in immunohistochemical staining and western blotting.                                                                                                                                                                                                                                                                                                      |
| Purity/Purification                            | Antigen-specific affinity chromatography followed by Protein A affinity chromatography                                                                                                                                                                                                                                                                                                                                                                                             |
| Form/Format                                    | Liquid; PBS, pH7.4, containing 0.02% NaN <sub>3</sub> , 50% glycerol.                                                                                                                                                                                                                                                                                                                                                                                                              |
| Concentration                                  | 1mg/ml (varies by lot)                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Sequence Length                                | 622                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Applicable Applications for anti-MSLN antibody | IP (Immunoprecipitation), ICC (Immunocytochemistry), IHC (Immunohistochemistry), WB (Western Blot)                                                                                                                                                                                                                                                                                                                                                                                 |
| Conjugation                                    | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Cross Reactivity                               | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Preparation and Storage                        | <p>Store at 4 degree C for frequent use. Aliquot and store at -20 degree C for 12 months. Avoid repeated freeze/thaw cycles.</p> <p>The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37 degree C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.</p> |
