

Rat Aldehyde Dehydrogenase 1 Family, Member L1 (ALDH1L1) ELISA Kit | ALDH1L1 elisa kit

Human Aldehyde Dehydrogenase 1 Family, Member L1 (ALDH1L1) ELISA Kit

CATALOG # AAA150019	REACTIVITY Rat
-------------------------------	--------------------------

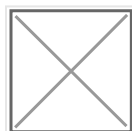

PRODUCT SYNONYMS

Aldehyde Dehydrogenase 1 Family; Member L1 (ALDH1L1); Human Aldehyde Dehydrogenase 1 Family; Member L1 (ALDH1L1) ELISA Kit; FTHFD; 10-fTHF; 10-Formyltetrahydrofolate Dehydrogenase; Cytosolic 10-formyltetrahydrofolate dehydrogenase; ALDH1L1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of ALDH1L1. No significant cross-reactivity or interference between ALDH1L1 and analogues was observed.
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	0.117ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level ALDH1L1 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level ALDH1L1 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for ALDH1L1 elisa kit	<p>Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of ALDH1L1 in human serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids.</p> <p>Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to ALDH1L1. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to ALDH1L1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain ALDH1L1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of ALDH1L1 in the samples is then determined by comparing the O.D. of the samples to the standard curve.</p>
