

## Human Oxidative Stress Responsive 1 (OXSR1) ELISA Kit | OXSR1 elisa kit

Human Oxidative Stress Responsive 1 (OXSR1) ELISA Kit

CATALOG #  
AAA150020

REACTIVITY  
Human

### PRODUCT SYNONYMS

Oxidative Stress Responsive 1 (OXSR1); Human Oxidative Stress Responsive 1 (OXSR1) ELISA Kit; OSR1; Serine/threonine-protein kinase OSR1; OXSR1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity              | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Oxidative Stress Responsive 1 (OXSR1). No significant cross-reactivity or interference between Oxidative Stress Responsive 1 (OXSR1) and analogues was observed.                                                                                                                                                                                                                                                |
| Sequence Length         | 527                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Assay Type              | Double-antibody Sandwich                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Samples                 | Tissue Homogenates, Cell Lysates And Other Biological Fluids                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Detection Range         | 0.156-10ng/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Sensitivity             | 0.061ng/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Precision               | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Oxidative Stress Responsive 1 (OXSR1) were tested 20 times on one plate, respectively.<br>Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Oxidative Stress Responsive 1 (OXSR1) were tested on 3 different plates, 8 replicates in each plate.<br>$CV(\%) = SD/mean \times 100$<br>Intra-Assay: $CV < 10\%$<br>Inter-Assay: $CV < 12\%$           |
| Preparation and Storage | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

|                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for OXSR1 elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Oxidative Stress Responsive 1 (OXSR1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Oxidative Stress Responsive 1 (OXSR1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Oxidative Stress Responsive 1 (OXSR1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Oxidative Stress Responsive 1 (OXSR1) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
