

Cattle Alpha-Lactalbumin (aLA) ELISA Kit | aLA elisa kit

Cattle Alpha-Lactalbumin (aLA) High Sensitive CLIA Kit

CATALOG # AAA150386	REACTIVITY Cattle	APPLICATIONS ELISA
-------------------------------	-----------------------------	------------------------------

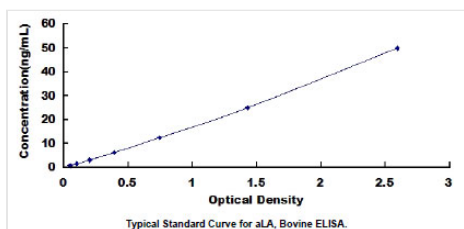

PRODUCT SYNONYMS

Alpha-Lactalbumin (aLA); Cattle Alpha-Lactalbumin (aLA) High Sensitive CLIA Kit; LALBA; LYZL7; Lactose Synthase B Protein; Lysozyme Like Protein 7; aLA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Cattle
Specificity	This assay has high sensitivity and excellent specificity for detection of aLA. No significant cross-reactivity or interference between aLA and analogues was observed.
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Milk, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	0.78-50ng/mL
Sensitivity	0.35ng/mL
Applicable Applications for aLA elisa kit	ELISA
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level aLA were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level aLA were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for aLA elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of aLA in bovine serum, plasma, milk, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to aLA. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to aLA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain aLA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of aLA in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for aLA elisa kit	Tumor immunity; Infection immunity; Endocrinology; Reproductive science; Hormone metabolism

NCBI AND UNIPROT INFORMATION

NCBI GI #	27805979
NCBI GeneID	281894
NCBI Accession #	NP_776803.1
NCBI GenBank Nucleotide #	NM_174378.2
UniProt Accession #	P00711; Q3T111; Q95NE4
Molecular Weight	16,247 Da
NCBI Official Full Name	alpha-lactalbumin
NCBI Official Synonym Full Names	lactalbumin alpha
NCBI Official Symbol	LALBA
NCBI Official Synonym Symbols	alfaLA; a-LACTA
NCBI Protein Information	alpha-lactalbumin
UniProt Protein Name	Alpha-lactalbumin
UniProt Gene Name	LALBA
UniProt Synonym Gene Names	ALACTA

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
