

Mouse Neurotensin (NT) ELISA Kit | NT elisa kit

Mouse Neurotensin (NT)(Competitive EIA) ELISA Kit

CATALOG # AAA150876	REACTIVITY Mouse	APPLICATIONS ELISA
-------------------------------	----------------------------	------------------------------

PRODUCT SYNONYMS

Neurotensin (NT); Mouse Neurotensin (NT)(Competitive EIA) ELISA Kit; ELISA Kit for Neurotensin (NT); NT/Neurotensin; NTS; NTS1; NmN-125; NN; Tail peptide Neuromedin N; NT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of NT. No significant cross-reactivity or interference between NT and analogues was observed.
Assay Type	Quantitative Competitive
Samples	Mouse serum, plasma and other biological fluids
Detection Range	37.0-3,000pg/mL
Sensitivity	< 14.9pg/mL
Applicable Applications for NT elisa kit	ELISA
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level NT were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level NT were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	Store at 4 degree C for 1 month; -20 degree C for long-term (within shelf life) The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for NT elisa kit	Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. An antibody specific to NT has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled NT and unlabeled NT (Standards or samples) with the pre-coated antibody specific to NT. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of NT in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of NT in the sample. Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of NT in mouse serum, plasma and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	13277358
NCBI GeneID	67405
NCBI Accession #	NP_077755.1
NCBI GenBank Nucleotide #	NM_024435.2
UniProt Accession #	Q9D3P9
Molecular Weight	19,608 Da
NCBI Official Full Name	neurotensin/neuromedin N
NCBI Official Synonym Full Names	neurotensin
NCBI Official Symbol	Nts
NCBI Official Synonym Symbols	NN; NT; NT/N; NTS1; NMN-125; 5033428E16Rik
NCBI Protein Information	neurotensin/neuromedin N
UniProt Protein Name	Neurotensin/neuromedin N
UniProt Gene Name	Nts
UniProt Synonym Gene Names	NN; NmN; NT

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
