

Mouse Endomorphin 2 (EM2) ELISA Kit | EM2 elisa kit

Mouse Endomorphin 2 (EM2) ELISA Kit

CATALOG #
AAA151140

REACTIVITY
Mouse

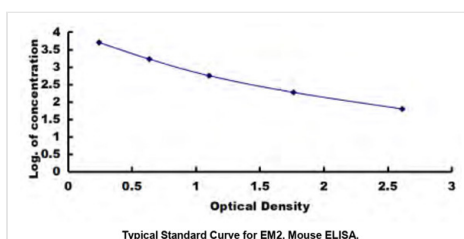

PRODUCT SYNONYMS

Endomorphin 2 (EM2); Mouse Endomorphin 2 (EM2) ELISA Kit; EM2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of EM2. No significant cross-reactivity or interference between EM2 and analogues was observed.
Assay Type	Quantitative Competitive
Samples	Mouse serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	61.7-5,000pg/mL
Sensitivity	< 29.8pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level EM2 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level EM2 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all the reagents should be kept according to the label on each vial. The Standard, Detection Reagent A, Detection Reagent B and the 96-well strip plate should be stored at -20 degree C while others should be at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for EM2 elisa kit	Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to EM2 has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled EM2 and unlabeled EM2 (Standards or samples) with the pre-coated antibody specific to EM2. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of EM2 in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of EM2 in the sample. Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of EM2 in mouse serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids.
---	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
