

Human anti-Chlamydia trachomatis (CT) antibody (IgG) ELISA Kit | CT elisa kit

Human anti-Chlamydia trachomatis (CT) antibody, IgG ELISA Kit

CATALOG #
AAA15228

REACTIVITY
Human

PRODUCT SYNONYMS

anti-Chlamydia trachomatis (CT) antibody (IgG); Human anti-Chlamydia trachomatis (CT) antibody; IgG ELISA Kit; Human anti-Chlamydia trachomatis (CT) antibody (IgG) ELISA Kit ; Human anti-Chlamydia trachomatis (CT) antibody (IgG); CT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of human anti-chlamydia trachomatis(CT) antibody (IgG). No significant cross-reactivity or interference between human anti-chlamydia trachomatis(CT) antibody (IgG) and analogues was observed.
Samples	Serum, plasma
Intra-assay Precision	Intra-assay Precision (Precision within an assay): CV%<15%. Three positive samples were tested twenty times on one plate to assess.
Inter-assay Precision	Inter-assay Precision (Precision between assays): CV%<15%. Three positive samples were tested in twenty assays to assess.
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

TYPICAL DATA

Test parameter	specification	test result
Positive control	>1.0	1.546
Negative control	<0.2	0.049
Positive rate	10. Positive	100%
Negative rate	10. Negative	100%

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for CT elisa kit

Principle of the Assay: This assay employs the qualitative enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with avidin and biotin-conjugated antigen. Samples are pipetted into the wells with anti-human IgG conjugated Horseradish Peroxidase (HRP). Any antibodies specific for the antigen present will bind to the pre-coated antigen. Following a wash to remove any unbound reagent, a substrate solution is added to the wells and color develops in proportion to the amount of human anti-chlamydia trachomatis(CT) antibody (IgG) bound in the initial step. The color development is stopped and the intensity of the color is measured.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
