

Rat Cathepsin H (CTSH) ELISA Kit | CTSH elisa kit

Rat Cathepsin H (CTSH)(Sandwich ELISA) ELISA Kit

CATALOG #
AAA152401

REACTIVITY
Rat

PRODUCT SYNONYMS

Cathepsin H (CTSH); Rat Cathepsin H (CTSH)(Sandwich ELISA) ELISA Kit; ELISA Kit for Cathepsin H (CTSH); CTS-H; CPSB; ACC4; ACC5; Minichain; Pro-cathepsin H; CTSH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of CTSH. No significant cross-reactivity or interference between CTSH and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Rat tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.057ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level CTSH were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level CTSH were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	Store at 4 degree C for 1 month/-20 degree C for long-term (within shelf life) Shelf-life: one year The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CTSH elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to CTSH. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to CTSH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain CTSH, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of CTSH in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of CTSH in rat tissue homogenates, cell lysates, cell culture supernates and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	6978721
NCBI GeneID	25425
NCBI Accession #	NP_037071.1
NCBI GenBank Nucleotide #	NM_012939.1
UniProt Accession #	P00786
Molecular Weight	37,104 Da
NCBI Official Full Name	pro-cathepsin H
NCBI Official Synonym Full Names	cathepsin H
NCBI Official Symbol	Ctsh
NCBI Protein Information	pro-cathepsin H; cathepsin B3; cathepsin BA
UniProt Protein Name	Pro-cathepsin H
UniProt Gene Name	Ctsh
UniProt Entry Name	CATH_RAT

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
