

Pig Transferrin (TF) ELISA Kit | TF elisa kit

Pig Transferrin (TF)(Competitive ELISA) ELISA Kit

CATALOG #
AAA152508

REACTIVITY
Pig

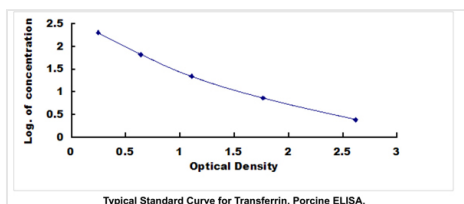

PRODUCT SYNONYMS

Transferrin (TF); Pig Transferrin (TF)(Competitive ELISA) ELISA Kit; ELISA Kit for Transferrin (TF); TRF; Siderophilin; Serotransferrin; Beta-1 metal-binding globulin; TF elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Pig
Specificity	This assay has high sensitivity and excellent specificity for detection of transferrin. No significant cross-reactivity or interference between transferrin and analogues was observed.
Assay Type	Quantitative Competitive
Samples	Porcine serum, plasma and other biological fluids
Detection Range	2.47-200ug/mL
Sensitivity	< 0.91ug/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level transferrin were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level transferrin were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	Store at 4 degree C for 1 month/-20 degree C for long-term (within shelf life) Shelf-life: one year The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for TF elisa kit	Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to transferrin has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled transferrin and unlabeled transferrin (Standards or samples) with the pre-coated antibody specific to transferrin. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of transferrin in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of transferrin in the sample. Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of transferrin in porcine serum, plasma and other biological fluids.

NCBI AND UNIPROT INFORMATION

UniProt Accession #	P09571
UniProt Protein Name	Serotransferrin
UniProt Gene Name	TF
UniProt Synonym Gene Names	Transferrin

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
