

Canine Calprotectin ELISA Kit | CALP elisa kit

Canine calprotectin, CALP ELISA Kit

CATALOG #
AAA15870

REACTIVITY
Canine

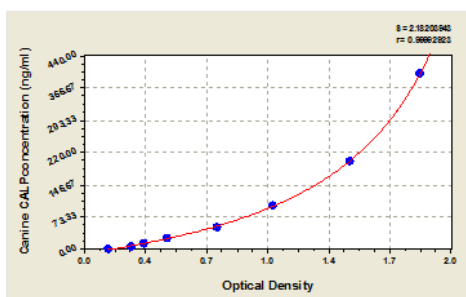

PRODUCT SYNONYMS

Calprotectin; Canine calprotectin; CALP ELISA Kit; Canine calprotectin (CALP) ELISA kit; CALP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This assay has high sensitivity and excellent specificity for detection of canine CALP. No significant cross-reactivity or interference between canine CALP and analogues was observed.
Sequence Length	20
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, tissue homogenates, cell lysates
Detection Range	6.25 ng/ml-400 ng/ml
Sensitivity	< 1.56 ng/ml
Intra-assay Precision	Intra-assay Precision (Precision within an assay): CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess.
Inter-assay Precision	Inter-assay Precision (Precision between assays): CV%<10%. Three samples of known concentration were tested in twenty assays to assess.
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

ADDITIONAL INFORMATION

Related Product Information for CALP elisa kit	Principle of the Assay: This assay employs the quantitative sandwich enzyme immunoassay technique. Antibody specific for CALP has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any CALP present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for CALP is added to the wells. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of CALP bound in the initial step. The color development is stopped and the intensity of the color is measured.

NCBI AND UNIPROT INFORMATION

NCBI GI #	806925
NCBI Official Full Name	calprotectin=urinary stone protein band A {N-terminal}, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
