

Human Ghrelin ELISA Kit | Ghrelin elisa kit

Human Ghrelin ELISA Kit

CATALOG #
AAA16003

REACTIVITY
Human

PRODUCT SYNONYMS

Ghrelin; Human Ghrelin ELISA Kit; Ghrelin elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of GHRE. No significant cross-reactivity or interference between GHRE and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between GHRE and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Ghrelin elisa kit	Intended Uses: This GHRE ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human GHRE. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: GHRE ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-GHRE antibody and an GHRE-HRP conjugate. The assay sample and buffer are incubated together with GHRE-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GHRE concentration since GHRE from samples and GHRE-HRP conjugate compete for the anti-GHRE antibody binding site. Since the number of sites is limited, as more sites are occupied by GHRE from the sample, fewer sites are left to bind GHRE-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GHRE concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	304435649
Molecular Weight	12,992 Da
NCBI Official Full Name	ghrelin
UniProt Protein Name	Ghrelin
UniProt Entry Name	E7CCH4_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
