

Human Tyrosinase ELISA Kit | Tyr elisa kit

Human Tyrosinase ELISA Kit

CATALOG #
AAA16010

REACTIVITY
Human

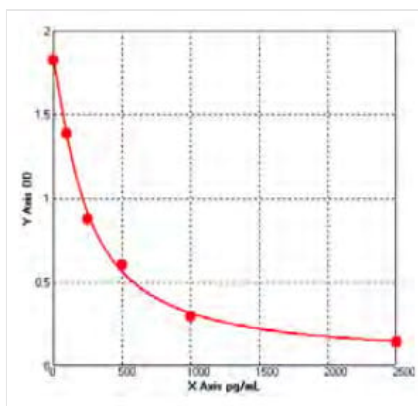

PRODUCT SYNONYMS

Tyrosinase; Human Tyrosinase ELISA Kit; Tyr elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of TYR. No significant cross-reactivity or interference between TYR and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between TYR and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Tyr elisa kit	Principle of the Assay: TYR ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-TYR antibody and an TYR-HRP conjugate. The assay sample and buffer are incubated together with TYR-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TYR concentration since TYR from samples and TYR-HRP conjugate compete for the anti-TYR antibody binding site. Since the number of sites is limited, as more sites are occupied by TYR from the sample, fewer sites are left to bind TYR-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TYR concentration in each sample is interpolated from this standard curve. Intended Uses: This TYR ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human TYR. This ELISA kit for research use only, not for therapeutic or diagnostic applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	329025995
Molecular Weight	19,455 Da
NCBI Official Full Name	TYR, partial
UniProt Protein Name	TYR
UniProt Gene Name	TYR
UniProt Entry Name	F5CQG8_MEGNO

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
