

Mouse Mullerian Hormone (AMH) ELISA Kit | AMH elisa kit

Mouse Anti-Mullerian Hormone (AMH) ELISA Kit

CATALOG #
AAA16088

REACTIVITY
Mouse

PRODUCT SYNONYMS

Mullerian Hormone (AMH); Mouse Anti-Mullerian Hormone (AMH) ELISA Kit; Mouse Anti-Mullerian Hormone ELISA Kit (AMH); Anti-Mullerian Hormone (AMH); Anti-Mullerian Hormone ELISA Kit (AMH) (Mouse); AMH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of AMH. No significant cross-reactivity or interference between AMH and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between AMH and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for AMH elisa kit	Principle of the Assay: AMH ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-AMH antibody and an AMH-HRP conjugate. The assay sample and buffer are incubated together with AMH-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the AMH concentration since AMH from samples and AMH-HRP conjugate compete for the anti-AMH antibody binding site. Since the number of sites is limited, as more sites are occupied by AMH from the sample, fewer sites are left to bind AMH-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The AMH concentration in each sample is interpolated from this standard curve. Intended Uses: This AMH ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse AMH. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
Product Categories/Family for AMH elisa kit	Mouse ELISA Kit

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
