

## Human Interferon Alpha/Beta Receptor 1 (IFNa/bR1) ELISA Kit | IFNa/bR1 elisa kit

Human Interferon Alpha/Beta Receptor 1 (IFNa/bR1) ELISA Kit

CATALOG #  
**AAA161522**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Interferon Alpha/Beta Receptor 1 (IFNa/bR1); Human Interferon Alpha/Beta Receptor 1 (IFNa/bR1) ELISA Kit; IFNa/bR1 ELISA kit (Human); IFNAR1; AVP; IFN-alpha-REC; IFNAR; IFNBR; IFRC; Interferon-Alpha; Beta And Omega Receptor Alpha Chain; Cytokine receptor family 2 member 1; IFNa/bR1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Reactivity              | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Interferon Alpha/Beta Receptor 1 (IFNa/bR1). No significant cross-reactivity or interference between Interferon Alpha/Beta Receptor 1 (IFNa/bR1) and analogues was observed.<br>Reactive with Human IFNa/bR1/Interferon Alpha/Beta Receptor 1                                                                                                                                                                                                                                                                                 |
| Assay Type              | Double-antibody Sandwich                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Samples                 | Tissue homogenates, Cell lysates and other biological fluids                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Detection Method        | Colormetric                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Featured Series         | SE kit                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Detection Range         | 0.156-10ng/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Test Principle          | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Interferon Alpha/Beta Receptor 1 (IFNa/bR1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Interferon Alpha/Beta Receptor 1 (IFNa/bR1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Interferon Alpha/Beta Receptor 1 (IFNa/bR1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Interferon Alpha/Beta Receptor 1 (IFNa/bR1) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| Research Area           | Signal transduction, Infection immunity                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Preparation and Storage | Store at 4 degree C for 1 month/-20 degree C for long-term (One year within shelf life)<br>The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
