

Rat Glucagon Like Peptide 1 ELISA Kit | GLP-1 elisa kit

Rat Glucagon Like Peptide 1 ELISA Kit

CATALOG #
AAA16172

REACTIVITY
Rat

PRODUCT SYNONYMS

Glucagon Like Peptide 1; Rat Glucagon Like Peptide 1 ELISA Kit; GLP-1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of GLP-1. No significant cross-reactivity or interference between GLP-1 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between GLP-1 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GLP-1 elisa kit	Principle of the Assay: GLP-1 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-GLP-1 antibody and an GLP-1-HRP conjugate. The assay sample and buffer are incubated together with GLP-1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GLP-1 concentration since GLP-1 from samples and GLP-1-HRP conjugate compete for the anti-GLP-1 antibody binding site. Since the number of sites is limited, as more sites are occupied by GLP-1 from the sample, fewer sites are left to bind GLP-1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GLP-1 concentration in each sample is interpolated from this standard curve. Intended Uses: This GLP-1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat GLP-1. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
Product Categories/Family for GLP-1 elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	20069294
Molecular Weight	9,793 Da
NCBI Official Full Name	GLP-1, partial
UniProt Protein Name	GLP-1
UniProt Entry Name	G5EBZ0_CAEEL

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
