

Rabbit Interleukin 1beta ELISA Kit | IL-1beta elisa kit

Rabbit Interleukin 1beta ELISA Kit

CATALOG #
AAA16235

REACTIVITY
Rabbit

PRODUCT SYNONYMS

Interleukin 1beta; Rabbit Interleukin 1beta ELISA Kit; Rabbit Interleukin 1b ELISA Kit; IL-1beta elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This IL-1beta ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit IL-1beta. This ELISA kit for research use only!

Principle of the Assay: IL-1beta ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-IL-1beta antibody and an IL-1beta-HRP conjugate. The assay sample and buffer are incubated together with IL-1beta-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the IL-1beta concentration since IL-1beta from samples and IL-1beta-HRP conjugate compete for the anti-IL-1beta antibody binding site. Since the number of sites is limited, as more sites are occupied by IL-1beta from the sample, fewer sites are left to bind IL-1beta-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The IL-1beta concentration in each sample is interpolated from this standard curve.
