ADDITIONAL INFORMATION

Related Product Information for anti-SRA1/SRA antibody	Functional RNA which acts as a transcriptional coactivator thatselectively enhances steroid receptor-mediated transactivationligand-independently through a mechanism involving the modulatingN-terminal domain (AF-1) of steroid receptors. Also mediatestranscriptional coactivation of steroid receptors ligand-dependentlythrough the steroid-binding domain (AF-2). Enhances cellularproliferation and differentiation and promotes apoptosis in vivo. Mayplay a role in tumorigenesis.
