ADDITIONAL INFORMATION

Related Product Information for anti-TFE3 antibody	TFE3 antibody is an unconjugated mouse monoclonal antibody to human TFE3. Validated for ELISA, IHC and WB. TFE3 (Transcription factor binding to IGHM enhancer 3) is a nuclear protein that promotes the expression of genes downstream to TGF-beta signaling. Chromosomal translocations between this gene (located on Xp11.2) and other genes promote growth and proliferation, and oncogenic activation. Translocation or overexpression of this gene has been implicated in renal cell carcinoma, lung adenocarcinoma, alveolar soft-part sarcoma, papillary thyroid carcinoma, melanoma, and mesotheliomas. It is expressed in a wide variety of tissues, and is nuclear in localization.
