

Rat FIII ELISA Kit | FIII elisa kit

Rat FIII (Coagulation Factor III) ELISA Kit

CATALOG #
AAA163457

REACTIVITY
Rat

PRODUCT SYNONYMS

FIII; Rat FIII (Coagulation Factor III) ELISA Kit; FIII elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Rat FIII. No significant cross-reactivity or interference between Rat FIII and analogues was observed. Note: Limited by current skills and knowledge, it is impossible for us to complete the cross- reactivity detection between Rat FIII and all the analogues, therefore, cross reaction may still exist.
Sequence Length	553
Samples	Serum, Plasma, Biological Fluids
Assay Type	Sandwich
Detection Range	31.25-2000pg/mL
Sensitivity	Min: 18.75pg/mL; Max: 2000pg/mL
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for FIII elisa kit	Description: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of FIII in Rat serum, plasma and other biological fluids Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat FIII. Standards or samples are added to the appropriate micro ELISA plate wells and bound by the specific antibody. Then a biotinylated detection antibody specific for Rat FIII and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat FIII, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Rat FIII. You can calculate the concentration of Rat FIII in the samples by comparing the OD of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	213556936
Molecular Weight	59,160 Da
NCBI Official Full Name	fusion protein
UniProt Protein Name	Fusion glycoprotein F0
UniProt Gene Name	F
UniProt Entry Name	B7U4C2_9PARA

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
