

## Rat SDF2 ELISA Kit | SDF2 elisa kit

Rat SDF2 (Stromal Cell Derived Factor 2) ELISA Kit

CATALOG #  
**AAA163518**

REACTIVITY  
**Rat**

### PRODUCT SYNONYMS

SDF2; Rat SDF2 (Stromal Cell Derived Factor 2) ELISA Kit; SDF2 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                    |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                                                                |
| Specificity             | This kit recognizes natural and recombinant Rat SDF2. No significant cross-reactivity or interference between Rat SDF2 and analogues was observed. |
| Sequence Length         | 211                                                                                                                                                |
| Samples                 | Serum, Plasma, Biological Fluids                                                                                                                   |
| Assay Type              | Sandwich                                                                                                                                           |
| Detection Range         | 15.625-1000pg/mL                                                                                                                                   |
| Sensitivity             | Min: 9.375pg/mL; Max: 1000pg/mL                                                                                                                    |
| Preparation and Storage | Store at 4 degree C.                                                                                                                               |

| Related Product Information for SDF2 elisa kit | <p>Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Rat SDF2 concentrations in serum, plasma and other biological fluids.</p> <p>Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to SDF2. Standards or samples are added to the appropriate micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for SDF2 and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain SDF2, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of SDF2. You can calculate the concentration of SDF2 in the samples by comparing the OD of the samples to the standard curve.</p> |
