

Human Leukotriene B4 ELISA Kit | LTB4 elisa kit

Human Leukotriene B4 ELISA Kit

CATALOG #
AAA16360

REACTIVITY
Human

PRODUCT SYNONYMS

Leukotriene B4; Human Leukotriene B4 ELISA Kit; LTB4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of LTB4. No significant cross-reactivity or interference between LTB4 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between LTB4 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for LTB4 elisa kit	Principle of the Assay: LTB4 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-LTB4 antibody and an LTB4-HRP conjugate. The assay sample and buffer are incubated together with LTB4-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the LTB4 concentration since LTB4 from samples and LTB4-HRP conjugate compete for the anti-LTB4 antibody binding site. Since the number of sites is limited, as more sites are occupied by LTB4 from the sample, fewer sites are left to bind LTB4-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LTB4 concentration in each sample is interpolated from this standard curve. Intended Uses: This LTB4 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human LTB4. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
Product Categories/Family for LTB4 elisa kit	Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
