

Mouse Glucose Transporter 4 ELISA Kit | GLUT4 elisa kit

Mouse Glucose Transporter 4 ELISA Kit

CATALOG #
AAA16364

REACTIVITY
Mouse

PRODUCT SYNONYMS

Glucose Transporter 4; Mouse Glucose Transporter 4 ELISA Kit; GLUT4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of GLUT4. No significant cross-reactivity or interference between GLUT4 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between GLUT4 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/ml
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GLUT4 elisa kit	Principle of the Assay: GLUT4 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-GLUT4 antibody and an GLUT4-HRP conjugate. The assay sample and buffer are incubated together with GLUT4-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GLUT4 concentration since GLUT4 from samples and GLUT4-HRP conjugate compete for the anti-GLUT4 antibody binding site. Since the number of sites is limited, as more sites are occupied by GLUT4 from the sample, fewer sites are left to bind GLUT4-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GLUT4 concentration in each sample is interpolated from this standard curve. Intended Uses: This GLUT4 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse GLUT4. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
Product Categories/Family for GLUT4 elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	61661420
Molecular Weight	20,643 Da
NCBI Official Full Name	glut4, partial
UniProt Protein Name	Glut4
UniProt Entry Name	Q58HK0_SHEEP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
